

Illés István Kristóf

Emerging Python developer who designs automation from lived HR/TA operations expertise at **Ericsson, Infineon, and Bosch**. Builds human-in-the-loop document and workflow tools (FastAPI, SQL, Git) used in enterprise talent contexts — bridging business process and implementation. Pattern: **calculate** → **review** → **generate** → **approve** → **ship**. Uses AI daily for speed while owning architecture, validation, and release decisions.

PROJECTS

Universal HR HUB — Python / FastAPI

Ongoing · Ericsson HR/TA context

- Modular HR document factory: vacation calculation → contract template engine ({{{token}}} substitution) → print automation addon ("Nyomtatás")
- Human-in-the-loop gates before export/print; empty optional fields pruned from real document output
- Backend: Python 3.x, FastAPI, Pydantic models, REST-style APIs; SQL schema thinking (PostgreSQL/MySQL class designs)
- Concepts for candidate profiles, interview score aggregation, evaluation-form standardisation, funnel KPIs (source of hire, conversion, time-to-hire), department reporting
- ATS-adjacent sync patterns (SuccessFactors / SmartRecruiters) via API pull/push to reduce duplicate entry
- Design target: ~**30–40% less admin burden** per user through standardisation; PyInstaller packaging context for desktop distribution
- Interactive browser demo of the vacation → contract → print pipeline on krisithecoder.hu

Flight Price Tracker — Python

Public · github.com/KrisiBoy/FlightPriceTracker

- Autonomous price monitoring, historical trend tracking, notification hooks, scheduled automation runs
- FastAPI service context with Capacitor Android / Railway deploy in related work

Personal experience hub — HTML / CSS / JS

krisithecoder.hu

- Responsive story-first site with interactive path deep-dives and live HUB workflow demo (vanilla JS, modern CSS)

TheOnlineYou — agency concept

Product / business thinking

- Subscription web-services model for SMEs — combining ops knowledge with technical delivery framing

PROFESSIONAL SYSTEMS CONTEXT

Talent Acquisition Operation Partner — Ericsson

Apr 2025 – Present

- Builds/supports HR automation; SuccessFactors troubleshooting; escalates to IT partners in India and Sweden
- Local AI filtering rollout (testing, feedback loops, team training)
- Informal Scrum Master on student team developing an internal AI agent — delivery exposure with engineering mentors

IT Maintenance & System Administrator — VR Vidámpark

Dec 2019 – Aug 2021

- High-performance PC/VR hardware maintenance, diagnostics, networking, proactive schedules — uptime under customer pressure

TECHNICAL SKILLS

Languages: Python (OOP, data structures, exceptions, regex, file/system), SQL, HTML5, CSS3, JavaScript (practical)

Frameworks / tools: FastAPI, Pydantic, REST design, Git / GitHub (branch, merge, PRs), PyInstaller

Practices: Human-in-the-loop automation, process-first architecture, AI-assisted development with owned validation

Enterprise systems: SuccessFactors, SmartRecruiters, SAP HR (operator + automation context)

Languages (human): Hungarian C2 · English C1

EDUCATION & CERTIFICATIONS

BSc Economics — HR Specialization, KRE

2020 – 2024

Technical Diploma — Optical Network Design & Maintenance, Puskás Tivadar

2017 – 2018

IBM/Coursera: Python for Data Science, AI & Development (2026); Introduction to Software Engineering (2026)

Skillsoft: Pythonista · Generative AI fundamentals · Applying Machine Learning

Forage: Datacom Software Development · BCG Platinion Architecture
